The UCRP / LANS asset transfer has been successfully completed
As part of the closeout of the University of California’s contract with the Department of Energy to manage Los Alamos National Laboratory, UC has completed agreements with the Department of Energy (DOE) / National Nuclear Security Administration (NNSA) regarding the transfer of University of California Retirement Plan (UCRP) assets and liabilities associated with Los Alamos National Laboratory service and DOE/ NNSA’s ongoing reimbursement obligation to UC for UCRP funding shortfalls related to the retained LANL members. The transfer of assets and liabilities under these agreements will have no adverse effect on UCRP and are not related to The Regents’ current plan to restart employer and employee contributions to UCRP. The UCRP assets and liabilities associated with the LANL Retained Segment will be carefully tracked and accounted for, and underfunding will be addressed by the funding formula under the agreement with the DOE. The Regents’ decision to restart contributions will not affect any UCRP retired and inactive members, including LANL retired or inactive members retained in UCRP.

You can choose to opt out of the Talx Participation Program
You may remember that in December 2006 the University of California contracted with the TALX Corporation to provide enhanced W-2 tax services. If you did not opt out, The University of California transmitted your W-2 data to the TALX Corporation at tax time. In light of the concerns raised by faculty that an “opt out” option was used rather than an “opt in” option, UCOP will:

- Change the At Your Service Online website to allow any UC employee to request that his/her W2 data and log-on information be purged from the Talx data base. This capability via the At Your Service Online web site will be implemented ASAP and will be available until July 1, 2007 for the 2006 W-2 records.
- Change the Talx service for the 2007 tax year to an “opt in” model where W2 information for employees will only be transmitted to Talx with the express consent of the individual.

You can follow these steps to “Opt Out” on the “At Your Service Online” website before July 1, 2007:
1. Logon to: [https://atyourserviceonline.ucop.edu/asyo;jsessionid=00000FL5nkmuvnQRNla3bXGYLfa-121bkpv9](https://atyourserviceonline.ucop.edu/asyo;jsessionid=00000FL5nkmuvnQRNla3bXGYLfa-121bkpv9)
2. Click on “W-2” under the “Income and Taxes” header
3. On the menu on the left-hand side of the screen, choose “Delete data from Talx”

Are you active in your pursuit to live a healthy lifestyle? If not, UCLA Recreation’s FITWELL program should do the trick! FITWELL is composed of numerous free workshops to help educate, motivate and empower faculty, staff and students to make healthy lifestyle choices specifically in the areas of fitness and exercise, nutrition and weight management, stress management, and general health education.

For more information about the FITWELL program please visit [http://www.recreation.ucla.edu/recreate/fit.aspx?main=7&sub=209&mymenu=-1](http://www.recreation.ucla.edu/recreate/fit.aspx?main=7&sub=209&mymenu=-1)
